Endpoint Probe Results

Source probe report: probe_report_20260523_142841.json

Summary:

Base host responded for `` (GET/POST) with HTML (200).

Common chat-related paths (e.g. ``/chat``, ``/api/chat``, ``/api/v1/chat``, ``/chatbot``, ``/api/message``, etc.) returned 404 for GET/POST.

``OPTIONS`` requests typically returned 200 with ``Allow: POST,OPTIONS,HEAD,GET``.

Notes & Recommendations

The target does not expose a JSON `/chat` API publicly. If you expect an API, check for private subdomain, authenticated endpoints, or embedded JS that contacts a different host.

If you want deeper testing, provide authentication headers or a specific API base URL.

We can extend payloads and retry with custom headerstell me which next.
